LUONG DO MINH HUNG

Expert, Software Engineering (Architecture, Reliability & Multi-Platform)

minhhung2556@gmail.com · (+84) 775005110 · Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Expert Software Engineer and Technical Lead with 13+ years of experience (10+ years leading engineering teams and system architecture) delivering mission-critical financial, payment, and e-commerce platforms (Home Credit, Sendo, SenPay). Deep technical expertise spanning Mobile (Dart/Flutter, Swift, Kotlin, Android, iOS), Backend (Java, Python, OpenAPI/REST), and Web (TypeScript, ReactJS). Proven track record in low-level architecture design, SOLID principles, design patterns, and runtime/compilation optimization. Highly accomplished in mentoring Officer-level and senior engineers, driving peer code reviews, establishing test automation (unit, integration, contract testing), collaborating with QE on defect triage, and hardening enterprise security (OWASP, FIDO, TLS, App Attest).

CORE COMPETENCIES

- **Architecture & Low-Level Design:** Low-Level Architecture, SOLID Principles, Design Patterns, Microservices & Modular Platforms, High Concurrency & Scalability, Compiling & Runtime Deep Understanding.
- **Code Quality, Testing & Reliability:** Peer Code Reviews, Coding Standards Enforcement, Unit / Integration / Contract Testing, Test Automation, Defect Triage & QE Collaboration, Observability (Logging, Monitoring, Tracing).
- **Technical Leadership & Mentorship:** Mentoring Officer & Senior Engineers, Engineering Best Practices, Process Improvement, Cross-Functional Team Leadership, Technical Documentation (System Design, API Specs, Guidelines).
- **Multi-Platform Engineering:** Mobile (Dart/Flutter, Swift, Kotlin, Android, iOS Native), Backend (Java, Spring Boot, Python/FastAPI, RESTful APIs), Web (TypeScript, ReactJS, Next.js), Azure CI/CD Pipelines.
- **Enterprise Security & Hardening:** OWASP Mobile Top 10, MASVS, Secure Auth & FIDO Passkeys, TLS & Certificate Pinning, Threat Modeling, Google Play Integrity & Apple App Attest, Vulnerability Scanning (OSV/SCA), RASP.

EXPERIENCE

EmbedIT Vietnam, Ho Chi Minh City — April 2022 – Present

Mobile Technical Lead / Senior Software Engineer

- Lead low-level architecture design and software component engineering for Home Credit digital payment and transaction systems across Vietnam and the Philippines, ensuring efficiency, scalability, and security.
- Serve on Technical Governance Committee: establish coding guidelines, enforce SOLID principles and design patterns, lead peer code reviews, and mentor Officer-level and senior engineers across distributed teams.
- Champion test automation and reliability: define unit, integration, and contract testing protocols; collaborate with QE teams to diagnose, troubleshoot, and remediate complex production defects.
- Author and maintain structured technical documentation, including OpenAPI specifications, low-level system design documents, and architectural guidelines for multi-country platforms.
- Automated vulnerability scanning and security reporting by integrating Google Open Source Vulnerability Scanner into Azure CI/CD pipelines, ensuring threat-resilient production deployments.
- Built internal developer tooling and Dart CLI generators from UML/OpenAPI specs, improving compile-time safety and accelerating delivery workflows.

Home Credit Vietnam, Ho Chi Minh City — December 2020 – April 2022

Mobile Technical Lead

- Architected and delivered core high-volume digital payment streams (mobile top-up, utility bills, QR payments, PayLater) scaling across 4 markets (Vietnam, Philippines, Indonesia, India).
- Audited legacy codebase and runtime performance; diagnosed security root causes, eliminated insecure third-party SDKs saving >€10,000/year, and optimized application size by 20–50%.
- Designed country-specific modular architecture and unified native Android/iOS-to-Flutter integration layer across 5 cross-functional engineering teams.
- Mentored developers on best practices and clean architecture; authored mobile development guidelines and delivered technical training sessions; recognized with the DNA Star leadership award.

Sendo.vn, Ho Chi Minh City — May 2018 – December 2020

Mobile Team Leader (Technical)

- Directed mobile engineering for top-4 Vietnam e-commerce platform; pioneered Vietnam's first Flutter super-app covering payment gateways (SenPay, ZaloPay, bank cards), flash sales, and high-traffic event systems.
- Resolved low-level rendering, multithreading, and concurrency bottlenecks hands-on, optimizing system responsiveness and runtime stability.
- Scaled engineering organization to 10+ cross-functional teams (100+ engineers); established rigorous code review standards, test automation workflows, and technical coaching programs.

SenPay.vn, Ho Chi Minh City May 2017 – May 2018

Android Team Leader

- Architected and built SenPay e-wallet and payment gateway Android application from scratch; published on Google Play with end-to-end security hardening and transaction reliability.
- Delivered digital payment features: phone top-ups, utility bill payments, e-wallet management, and domestic/international card processing; earned rapid promotions from Android Developer to Team Lead.

FinViet, Ho Chi Minh City April 2017 – May 2017

Senior Mobile App Developer

- Architected and prototyped FinViet Eco financial services application in React Native during early framework adoption, designing resilient client-server data synchronization.

Mobivi – iCareBenefits, Ho Chi Minh City June 2015 – June 2016

Android Team Leader

- Architected and shipped 6+ logistics and enterprise transaction apps from scratch (e-commerce, field sales, delivery tracking, customer service) with offline sync and reliable data workflows.

ME Corp, Ho Chi Minh City June 2012 – June 2015

Mobile App Developer

- Developed high-concurrency online gaming platform (20+ games, chat, event payment microservices) servicing 30M users using Java/J2ME and LibGDX; earned Best Employee recognition (2014).

TECHNICAL SKILLS

- **Programming Languages:** Dart, Kotlin, Swift, Java, TypeScript, JavaScript, Python.
- **Architecture & Design:** Low-Level System Design, SOLID Principles, Design Patterns, Microservices, Modular Super-App Architecture, High Concurrency & Low Latency, Compiling & Runtime Deep Understanding, UML.
- **Code Quality & Testing:** Unit Testing, Integration Testing, Contract Testing, Test Automation, Peer Code Reviews, QE Collaboration, Observability (Logging, Monitoring, Tracing), Technical Documentation (API Specs, System Design).
- **Platforms & Frameworks:** Flutter, Android (Native), iOS (Native), ReactJS, Next.js, FastAPI, Spring Boot, RESTful APIs, OpenAPI.
- **Security & Infrastructure:** OWASP Mobile Top 10, MASVS, FIDO Passkeys, TLS & Certificate Pinning, Google Play Integrity, Apple App Attest, Vulnerability Scanning (OSV/SCA), Threat Modeling, Azure Pipelines, CI/CD.
- **Domains:** Banking & Fintech, Digital Payments (QR, E-Wallets, Bill Pay, PayLater), E-Commerce Super-Apps, Real-Time High-Volume Systems.

SELECTED CREDENTIALS AND SPEAKING

Executive Leadership Certification · *High-Impact IT Leader (CIO / CTO / IT Director)* 2023

Speaker & Mentor · *Home Credit TechTalks (2021) · Google DevFest HCM Flutter Training (2021)* 2021

Technical Author · *Home Credit IT Blog Series · Medium (romanticdeveloper.medium.com)* 2021 – Present

REFERENCE LINKS
