LUONG DO MINH HUNG

Senior Fullstack Engineer – Client Platform & Messaging

minhhung2556@gmail.com · (+84) 775005110 · Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 12+ years of experience engineering high-scale client-side applications, instant messaging features, and cross-platform architectures serving over 30 million users. Expert in Android (Kotlin/Java), iOS (Swift), and Web (TypeScript, ReactJS, Next.js), with deep technical mastery of real-time communication protocols (WebSocket, MQTT, gRPC), offline-first state synchronization, and client performance tuning. Pioneered AI-powered software workflows using Cursor, GitHub Copilot, ChatGPT, and Claude to read, debug, and deliver fullstack cross-platform codebases with speed, high security, and exceptional code quality.

CORE COMPETENCIES

- **Client-Side & Cross-Stack Architecture:** Android (Kotlin/Java), iOS (Swift/SwiftUI), Web (TypeScript, React, Next.js), Cross-Platform Client Design
- **Real-Time Messaging & Protocols:** WebSocket, MQTT, gRPC, Real-Time Chat, Offline Messaging & Sync, Push Notifications, Media Messaging
- **AI-Assisted Engineering:** Cursor, GitHub Copilot, ChatGPT, Claude Workflows, Cross-Stack Debugging, AI Agent Automation
- **Performance & Optimization:** Client Startup Acceleration, Memory & Battery Optimization, Network Efficiency, Multithreading
- **State Management & Security:** Local Storage Persistence, Message Delivery & Sync Logic, OWASP Mobile Top 10, TLS & Certificate Pinning
- **Engineering Leadership:** Technical Governance, Mentorship, Cross-Functional Collaboration, Git, CI/CD Pipelines, Agile Execution

EXPERIENCE

EmbedIT Vietnam, Ho Chi Minh City — April 2022 – Present

Mobile Technical Lead / Senior Software Engineer

- Lead client-side digital payment and transaction feature engineering in Home Credit super-apps across Vietnam and the Philippines, ensuring consistent UX and high reliability.
- Pioneered AI-assisted cross-stack development using Cursor, Claude, and GitHub Copilot to rapidly prototype, debug, and modify mobile and web codebases.
- Architected local data persistence and mobile data synchronization prototypes using FastAPI and REST/gRPC interfaces for scalable client-server data exchange.
- Engineered Dart CLI tools and automated OpenAPI/Figma-to-code generation, streamlining cross-platform UI development and data model consistency.
- Demonstrated automated dependency and code vulnerability scanning via Azure CI/CD pipelines using Google Open Source Vulnerability Scanner; governed mobile release standards.

Home Credit Vietnam, Ho Chi Minh City — December 2020 – April 2022

Mobile Technical Lead / Solution Architect

- Architected and delivered multi-market client application features (mobile top-up, bill payments, QR transactions, PayLater) across Vietnam, Philippines, Indonesia, and India.
- Migrated legacy native Android (Kotlin/Java) and iOS modules into unified cross-platform client plugin architecture, establishing reusable module standards.
- Optimized client application performance, driving 20–50% app size reduction and significantly improving startup speed and memory efficiency.
- Audited legacy mobile codebase security, identified root-cause SDK vulnerabilities, and removed unsafe packages, saving >€10,000 annually.
- Expanded Vietnam mobile engineering team from 3 engineers to 5 cross-functional teams; mentored engineers and advised technical design decisions across client stacks.

Sendo.vn, Ho Chi Minh City — May 2018 – December 2020

Mobile Team Leader (Technical)

- Led client engineering for top-4 Vietnam e-commerce platform, delivering Vietnams first super-app with real-time event messaging, payment wallets (SenPay, ZaloPay), and mini-games.
- Resolved complex client rendering bottlenecks, memory leaks, and offline state synchronization issues hands-on across mobile and client-side web interfaces.
- Established engineering guidelines and scaled client engineering organization to 10+ cross-functional teams with up to 100 total members.

SenPay.vn, Ho Chi Minh City May 2017 – May 2018

Android Team Leader

- Architected and built SenPay e-wallet Android application from scratch; integrated RESTful APIs, real-time push notifications, and local offline persistence; published on Google Play.

FinViet, Ho Chi Minh City April 2017 – May 2017

Senior Mobile App Developer

- Architected and prototyped FinViet Eco financial application in React Native, pioneering early adoption of cross-stack web/mobile JavaScript frameworks.

Mobivi – iCareBenefits, Ho Chi Minh City June 2015 – June 2016

Android Team Leader

- Architected and published 6+ Android applications from scratch featuring local database storage, background synchronization, and network-efficient push messaging.

ME Corp, Ho Chi Minh City June 2012 – June 2015

Mobile App Developer

- Engineered real-time chat, multiplayer messaging, and event platform features for a 30M user gaming application using Java/J2ME and LibGDX.
- Built MOBO Android SDK social network client with instant messaging and player networking capabilities.

SELECTED CREDENTIALS & SPEAKING

High-Impact Information Technology Leader: Succeed as CIO / CTO / IT Director · *Executive Leadership Certification* 2023

Speaker & Mentor · *Home Credit TechTalks (2021) · Google DevFest HCM City Flutter Mentor (2021)* 2021

Technical Author · *Home Credit IT Blog series · Medium (https://romanticdeveloper.medium.com)* Present

TECHNICAL SKILLS

- **Client Platforms:** Android (Kotlin, Java, Jetpack, Android SDK), iOS (Swift, SwiftUI), Web (TypeScript, ReactJS, Next.js), Flutter & Dart
- **Messaging & Protocols:** WebSocket, MQTT, gRPC, RESTful APIs, Real-Time Chat, Push Notifications, Offline Messaging, Cross-Platform Sync
- **AI & Development Tools:** Cursor, GitHub Copilot, ChatGPT, Claude Workflows, AI Agent Automation, Python Data Pipelines
- **Architecture & Performance:** Client Architecture, State Management, Local Persistence (SQLite, Key-Value), Startup Speed Optimization, Memory Management, Multithreading
- **Security & DevOps:** OWASP Mobile Top 10, TLS/Certificate Pinning, FIDO Passkeys, Git, Azure Pipelines CI/CD, App Store & Google Play Operations

EDUCATION

Tra Vinh University · *Bachelor of Information Technology (GPA 3.7/4.0)* 2024 – 2026

Open University Ho Chi Minh City · *Associate's Degree, Computer Science (Perfect Score on Computer Graphics)* 2008 – 2011
