# LUONG DO MINH HUNG

**Software Engineering Manager / Product Lead (AI-Native & Systems Architecture)**

minhhung2556@gmail.com · (+84) 775005110 · Ho Chi Minh City, Vietnam

## PROFESSIONAL SUMMARY

AI-native Software Engineering Lead and Product Builder with 12+ years of experience designing high-concurrency distributed systems, microservices, and multi-platform applications. Proven track record of operating as an autonomous engineering force—leveraging Agentic Workflows, Model Context Protocol (MCP), and LLM coding platforms to orchestrate rapid product execution while maintaining rigorous architectural integrity, security, and verification. Expert in system design (microservices, event-driven architecture with Kafka/Redis, high-throughput financial transactions), API design, and multi-language development across Java, Python, Dart/Flutter, and React/Node.js.

## CORE COMPETENCIES

- **AI-Native Engineering & Agentic Workflows:** Agentic Workflows, Model Context Protocol (MCP), AI Guardrails & Evals, Prompt & Context Engineering, Cursor Agent Workflows, LLM Systems (Gemini, Claude, Ollama), AI Code Output Verification & Refactoring.
- **System Architecture & Design:** Microservices, Event-Driven Architecture (Kafka, Redis), High-Performance & Low-Latency Transactions, Modular Monoliths, API Design (OpenAPI, REST), Technical Debt Remediation.
- **Product Leadership & Delivery:** Autonomous End-to-End Product Building, Requirements Decomposition, Architecture Trade-off Analysis, Cross-functional QC Coordination, Software Quality Assurance.
- **Full-Stack & Cloud Technologies:** Java (Spring Boot), Python (FastAPI), Dart/Flutter, ReactJS/Next.js, Node.js, SQL/NoSQL (MySQL, PostgreSQL, MongoDB), Docker, Kubernetes, Azure Pipelines / CI/CD.

## EXPERIENCE

**EmbedIT Vietnam**, Ho Chi Minh City — April 2022 – Present

*Mobile Technical Lead / Senior Software Engineer*

- Lead AI-native product builder and engineering lead for Home Credit digital payment and transaction features across Vietnam and the Philippines, operating with high autonomy from requirement analysis to system design and verified code release.
- Pioneered AI agent workflows and Model Context Protocol (MCP) tooling inside developer environments, decomposing complex feature tasks into guided AI execution steps and reducing delivery cycle times by 40%.
- Engineered automated Dart/Python tooling and OpenAPI code generation pipelines, enforcing strict architectural consistency, type safety, and OWASP security guardrails on AI-generated outputs.
- Designed high-concurrency micro-services and mobile platform integrations; managed global mobile app architecture standards and refactored technical debt for multi-country deployments.
- Demonstrated automated vulnerability scanning and security reporting by integrating Google Open Source Vulnerability Scanner into Azure Pipelines, ensuring verified, threat-resilient production deployments.

**Home Credit Vietnam**, Ho Chi Minh City — December 2020 – April 2022

*Mobile Technical Lead*

- Architected and delivered core high-volume digital payment streams across 4 markets (Vietnam, Philippines, Indonesia, India), covering mobile top-up, utility bill payment, QR payment, and PayLater transaction flows.
- Led systematic codebase audits and architectural refactoring; eliminated insecure third-party SDK dependencies, reducing mobile binary size by 20–50% and saving over €10,000 annually.
- Designed country-specific modular architecture to scale and customize financial transaction features across 5 cross-functional engineering teams.
- Established engineering standards, code verification protocols, and technical governance, mentoring senior developers and solution architects.

**Sendo.vn**, Ho Chi Minh City — May 2018 – December 2020

*Mobile Team Leader (Technical)*

- Directed mobile engineering for top-4 Vietnam e-commerce platform; led native-to-Flutter super-app transformation encompassing payment gateways (SenPay, ZaloPay, bank cards), flash sales, and event ticketing.
- Deconstructed complex business requirements into modular, event-driven technical components, resolving complex platform trade-offs and bottlenecks hands-on.
- Scaled engineering organization from initial setup to 10+ cross-functional teams with up to 10 members each, building robust testing and code verification standards.

**SenPay.vn**, Ho Chi Minh City — May 2017 – May 2018

*Android Team Leader*

- Architected and launched SenPay e-wallet and payment gateway Android app from scratch; built secure transaction pipelines for utility bills, phone top-ups, and domestic/international card processing.
- Earned promotions from Android Developer to Sendo Android Lead, and subsequently Mobile Team Leader at Sendo.

**FinViet**, Ho Chi Minh City April 2017 – May 2017

*Senior Mobile App Developer*

- Architected and prototyped FinViet Eco financial services application in React Native during early framework adoption, designing resilient client-server data synchronization.

**Mobivi – iCareBenefits**, Ho Chi Minh City June 2015 – June 2016

*Android Team Leader*

- Architected and shipped 6+ logistics and enterprise transaction apps from scratch, supporting e-commerce, field sales, delivery tracking, and customer service operations.

**ME Corp**, Ho Chi Minh City June 2012 – June 2015

*Mobile App Developer*

- Developed high-concurrency real-time gaming platform (20+ games, chat, event payment microservices) servicing 30 million users using Java/J2ME and LibGDX; earned Best Employee recognition (2014).

## TECHNICAL SKILLS

- **AI-Native Tools & Workflows:** Agentic Workflows, Model Context Protocol (MCP), AI Evals & Guardrails, Context Engineering, AI Coding Assistants (Cursor, Gemini API, Claude, Ollama), AI-Output Verification & Refactoring.
- **Architecture & Design:** Microservices, Modular Monoliths, Event-Driven Architecture, High-Performance Low-Latency Systems, API Design (OpenAPI, REST), Technical Debt Management, UML.
- **Backend & Infrastructure:** Java (Spring Boot), Python (FastAPI), Node.js, SQL/NoSQL (MySQL, PostgreSQL, MongoDB), Redis, Kafka, Docker, Kubernetes, Azure Pipelines, CI/CD.
- **Web & Mobile Platforms:** Flutter, Dart, ReactJS, Next.js, Android, iOS, React Native, Mobile Security (OWASP Mobile Top 10, MASVS, MASTG, FIDO Passkeys, App Attest, Certificate Pinning).
- **Domains:** E-Commerce, Digital Payments, E-Wallets, Super-Apps, Real-Time High-Volume Financial Transactions.

## SELECTED CREDENTIALS AND SPEAKING

**High-Impact Information Technology Leader: Succeed as CIO / CTO / IT Director** 2023

**Speaker & Mentor: Home Credit TechTalk (2021) · Google DevFest HCM Flutter Training (2021)** 2021

**Writer: Home Credit IT Blog Series · Medium (romanticdeveloper.medium.com)** 2021 – Present

## EDUCATION

**Tra Vinh University** · *Bachelor of Information Technology* 2024 – 2026

- Completed; graduation pending; GPA 3.7 / 4.0

**Open University Ho Chi Minh City** · *Associate's Degree, Computer Science* 2008 – 2011

- Perfect score on Computer Graphics final exam
