LUONG DO MINH HUNG

Mobile Architect / Technical Lead

minhhung2556@gmail.com · (+84) 775005110 · Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Mobile architect and technical lead with 13+ years building consumer mobile products since 2012, including 10+ years in technical leadership and architectural governance.

Designed Super App platforms, led native-to-Flutter migrations, and delivered multi-country fintech payment products across Vietnam, the Philippines, Indonesia, and India.

Builds new mobile products from scratch and audits, optimizes, and hardens existing large-scale applications; shipped Vietnam's first Flutter super-app and SenPay e-wallet; at Home Credit, traced a security root cause, cut Software Development Kit cost more than €10,000 per year, and reduced app size 20–50%.

CORE COMPETENCIES

Mobile Architecture · Super App and Modular Platforms · Native-to-Flutter Migration · Multi-Country Product Design · Fintech and E-commerce Payments · Technical Standards and Governance · Team Building and Mentorship · Mobile Security · Secure Authentication and Authorization · Threat Modeling · Vulnerability Scanning and Penetration Testing · Transport Layer Security and Certificate Pinning · Device Integrity and Data Privacy · Continuous Integration and Continuous Delivery · Design-to-Code (Figma, OpenAPI, Dart) · Automation Workflows with Artificial Intelligence Agents · App Store and Google Play Operations

EXPERIENCE

EmbedIT Vietnam, Ho Chi Minh City

Mobile Technical Lead / Senior Software Engineer · April 2022 – Present

- Lead Digital Payment and Transaction feature delivery in the Home Credit application for Vietnam and the Philippines
- Serve on Governance for mobile development standards and App Store release management
- Recruit and onboard ReactJS engineers for the Global Mobile Application Content Management System
- Demonstrated automated vulnerability scanning and reporting with known vulnerabilities and an Azure Pipeline that runs Google Open Source Vulnerability Scanner and publishes reports
- Researched Super App Platform architecture and evaluated libraries for the Global Mobile Application program
- Refined Figma OpenAPI specifications for Dart code generation; demonstrated Figma-to-Flutter conversion through REST interfaces
- Presented Translation Management System feasibility for Global Mobile Application; prototyped mobile data synchronization with FastAPI
- Programmed Dart command-line tooling that generates Flutter project structure from Unified Modeling Language Class and Use Case diagrams

Home Credit Vietnam, Ho Chi Minh City

Mobile Technical Lead · December 2020 – April 2022

- Developed key features for Global Mobile Application Digital Payment and Transaction stream across Vietnam, the Philippines, and Indonesia: mobile top-up, bill payment, QR payment, PayLater, and related flows
- Audited legacy Android application; identified root cause of security issue; removed Software Development Kit and saved more than €10,000 per year
- Reduced app size 20–50% through architecture and integration changes
- Migrated existing Android and iOS native applications into a Flutter plugin integrated with the new Global Mobile Application Flutter project
- Designed country-specific architecture to scale and customize features per market across Vietnam, the Philippines, Indonesia, and India
- Expanded Vietnam engineering team for the new Global Mobile Application project from 3 engineers to 5 cross-functional teams

- Mentored mobile developers; advised on complex technical decisions as solution architect
- Established mobile development standards and guidelines; trained native developers transitioning to Flutter
- Presented first Home Credit Vietnam TechTalk; presented HomieTalk sessions on mobile development
- Earned DNA Star recognition for eight leadership qualities at Home Credit

Sendo.vn, Ho Chi Minh City

Mobile Team Leader (Technical) · May 2018 – December 2020

- Led mobile team for Sendo, a top-four Vietnam e-commerce platform; drove native-to-Flutter transition
- Shipped Vietnam's first Flutter super-app covering payments (SenPay wallet, bank cards, ZaloPay), flash sales, event templates, mini games, and travel ticketing
- Resolved unsupported Flutter features and mobile development blockers hands-on
- Established mobile development standards; coordinated hiring, coaching, and cross-functional teams
- Scaled mobile organization to 10+ cross-functional teams with up to 10 members each
- Mentored engineers who later led Flutter Vietnam and key mobile roles at other companies
- Presented TechTalk sessions on mobile application development

SenPay.vn, Ho Chi Minh City

Android Team Leader · May 2017 – May 2018

- Architected and built SenPay e-wallet and payment gateway Android application from scratch; published on Google Play
- Delivered digital payment features: phone top-up, scratch cards, utility bills, e-wallet, domestic and international card payments
- Earned promotion from Android developer to Sendo Android team lead, then Mobile Team Leader at Sendo

FinViet, Ho Chi Minh City

Senior Mobile App Developer · April 2017 – May 2017

- Architected and prototyped FinViet Eco financial services application in React Native during early framework adoption

Mobivi – iCareBenefits, Ho Chi Minh City

Android Team Leader · June 2015 – June 2016

- Architected and published 6+ Android applications from scratch: iCareBenefits e-commerce, iCareMember, FieldSale, Delivery Tracking, Delivery Trucks, iFix
- Delivered mobile products for logistics, field sales, and customer operations

ME Corp, Ho Chi Minh City

Mobile App Developer · June 2012 – June 2015

- Developed online games and platform features (20+ board games, chat, events, payments) for a 30 million user gaming application using J2ME and LibGDX
- Built MOBO Android Software Development Kit, a social network for game players; contributed LibGDX research and training
- Earned Best Employee recognition in 2014

SELECTED CREDENTIALS AND SPEAKING

- High-Impact Information Technology Leader: Succeed as Chief Information Officer / Chief Technology Officer / Information Technology Director (2023)
- Fifteen Great Chief Technology Officer Leadership Hacks
- Speaker: Home Credit Online TechTalk (2021)
- Mentor: Google DevFest Ho Chi Minh City Flutter Training (2021)
- Writer: Home Credit Information Technology Blog series; Medium (https://romanticdeveloper.medium.com/)

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, React Native, J2ME, LibGDX, Flutter plugins, native-to-Flutter migration

Web: ReactJS, Next.js

Backend and application programming interfaces: FastAPI, Python, Spring Boot, Java, OpenAPI, REST interfaces, Node.js

Architecture and design-to-code: Super App and modular platforms, multi-country product configuration, Unified Modeling Language, Dart command-line code generation, Figma, OpenAPI-to-Dart code generation, Translation Management System

Payments and product domains: QR payment, e-wallet, payment gateway, mobile top-up, bill payment, e-commerce super-app features

Mobile security: Open Web Application Security Project Mobile Top 10, Mobile Application Security Verification Standard, Mobile Application Security Testing Guide, secure authentication and authorization, FIDO passkeys, threat modeling, sensitive data protection, secure codebase and release hardening, Transport Layer Security and certificate pinning, root and jailbreak detection, Google Play Integrity API, Apple App Attest and DeviceCheck, vulnerability scanning, software composition analysis and software bill of materials, mobile penetration testing, Runtime Application Self-Protection, Google Open Source Vulnerability Scanner, dependency vulnerability scanning, data privacy and regulatory compliance

Delivery and DevOps: Azure Pipelines, Continuous Integration and Continuous Delivery, App Store and Google Play release management, mobile governance and release standards

Artificial intelligence and automation: Google Gemini application programming interface, retrieval-augmented question-and-answer agents, Ollama local models, Cursor agent workflows, Python web crawling and data pipelines, Claude

EDUCATION

Tra Vinh University · Bachelor of Information Technology · 2024 – 2026
Completed; graduation pending; GPA 3.7/4.0

Open University Ho Chi Minh City · Associate's Degree, Computer Science · 2008 – 2011
Perfect score on Computer Graphics final exam
